WORKED AS A GRAPHIC DESIGNER

Designed logos and appreciation certificates for an eSports community, demonstrating creativity and attention to detail.

PYTHON DJANGO INTERN

CBTech, KadavanthraOne-month training in Python Django framework, enhancing my backend development skills.

WEB DEVELOPMENT INTERN

(WordPress)Completed an internship in web development using WordPress, gaining practical experience in website creation, customization, and maintenance.

COLLEGE PROJECT

LEAVE MANAGEMENT SYSTEM

Developed a Leave Management System using PHP Laravel as part of a college project. The system streamlined leave requests, approvals, and tracking for employees or students, featuring an intuitive interface and automated notifications. It included user roles, allowing both applicants and managers to view and manage leave records efficiently.
